PASSED AUDITS (29)

Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

TABLES AND LISTS

<div><div></div></div> Lists do not contain only <code></code> elements and script supporting elements (<code><script></code> and <code><template></code>).	▼
---	---

These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

ARIA

<div><div></div></div> Uses ARIA roles on incompatible elements	▼
---	---

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
